PROFILE

Full-Stack Web Developer specializing in JavaScript, with a solid foundation built through GoMyCode. I am passionate about creating efficient, user-friendly websites and thrive on learning, adapting, and solving new challenges.

My goal is to continue growing in the field, exploring emerging technologies, and contributing to impactful projects. I am eager to collaborate, learn, and deliver high-quality web solutions that make a difference.

WORK EXPERIENCE

Freelance Full-Stack Web Developer

Freelance / Personal Projects

DATES: 3/3/2024 - PRESENT

- Developed MERN Stack Applications: Engineered dynamic social media and e-commerce platforms utilizing MongoDB, Express.js, React.js, and Node.js, ensuring responsive design and seamless user experiences.
- Mobile Application Development: Designed and implemented mobile applications for both iOS and Android platforms, collaborating with cross-functional teams to deliver high-quality apps.
- Collaborative Development: Worked closely with designers and product managers to transform requirements into functional, user-friendly applications, adhering to UI/UX principles.
- Applied version control using Git/GitHub, collaborating on code and managing project versions efficiently.
- Performance Optimization: Ensured applications performed optimally across various devices by troubleshooting and resolving issues related to performance, usability, and security.
- Continuous Learning and Adaptation: Stayed informed about the latest development technologies and trends, integrating new tools and practices to enhance application functionality and user satisfaction.
